

## Popa Ioan-Ciprian

The screenshot displays the Power Automate web interface in a browser. The browser's address bar shows the URL: `make.powerautomate.com/environments/Default-90bc7298-1c17-48c6-830b-e88b375f216d/flows/3fdbb604-57fe-47ee-96e9-0dc1f4c97607v3=false`. The browser's tab bar includes several open tabs, including "YouTube", "Facebook", "Netflix", "Google", "eMAG.ro - cea mai...", "[WoT] - Inca sunt ra...", "New Tab", "mp3", "SAVAGE GOLD DIG...", and "(17) how to bind ke...".

The Power Automate interface features a dark blue header with the "Universitatea de Vest din Timisoara" logo on the left, a search bar in the center, and user information on the right. The left sidebar contains a navigation menu with options like "Pornire", "Creare", "Sabloane", "Invatați", "Fluxurile mele", "Aprobări", "Soluții", "Explorarea proceselor", "Hub de inteligență artificială", "Activitatea fluxului pentru ...", "Mai mult", and "Power Platform".

The main workspace shows a flow configuration. The first step is "Când sosește un e-mail nou (V3)". An arrow points down to a "For each" loop. Inside the loop, the "Selectați un rezultat de la pași anteriori" dropdown is set to "Atașări". Below this, the "Creați fișierul" action is configured with the following settings:

- \* Cale folder: `/Power Automate`
- \* Nume fișier: `Atașări Nume`
- \* Conținut fișier: `Atașări Conținut`

At the bottom of the workspace, there are two buttons: "+ Pas nou" and "Salvare".
